well, All YOU lucky readers, this is not the column we started to do for you this week.

Through the amazing science of modern electronies, we began typing this week's column the other week.

However, somehow the magnetic diskettes which are used to store copy such as this column got mixed up and diskette No. 1. Thus file e on No. 2 was not theempty file eon No. 1 and therefore, file e with the column on got used — wiped out.

Just remember, all you electronic geniuses, it doesn't matter what the machine can do that counts.

BARRY SIEBOLD was busy the other day over at Shaw's Stationery, At least hesemed busy, but then he always seems busy at work.

We firmly believe in the Women's Movement and in the liberation of men. If a man can do a job as well as a woman, well then, we think he should be paid as much!

We're ecstatic about the appointment of a woman to the United States Supreme Court. What those eight old men decide to do about the Justices' restroom is their problem.

But it would appear that the Women's Movement is, unfortunately, on the downshide. Even Betty Friedan, who started it all back in the sixties with "The Feminine Mystique", admits in her new book that "we're in the second stage."

In the new issue of Woman's Day, she freely admits that "being a superwoman is not the way to go."

Tell me whould if Betty.

Tell me way to go."

to believe...small towns where neighbors vie to seek who can produce the whitest wash on the inflation that make it necessary for them to she superwomen. First, scrape away heavy oil and grease ance of your garage? A fresh coat of paint and some wall organizers will help hut, before yon pick up a hammer of huy paint, check the walls, floor and ceiling closely for cracks and holes.

"Painting your garage will create a more linshed look," says Raiph Wusthoif of Red Devil Inc., the nation's leading producer of painters' hand tools and chemical dostrourself products.

"However, to ensure a complete and prolessional-looking joh, take time to repair cracks and holes in masonry hefore painting. You may wind up with costly and extensive repairs, later when these cracks and holes enlarge.

"Most of the repairs can be done quickly and easily with concrete and mortar repair caulk or concrete patch and a few hand tools."

Before repairing a cracked, grease-covered ement floor, remove oil, grease and stains with a solution of garage and drive-with a series of the reach or hole to ensure a strong bond.

Next, pack concrete patch into the void with a pointing trowel, making sure to eliminate air pockets. Level with a concrete with a songle form. Clear away loose cement chunks with an old screwdriver, stiff putty knife or scraper.

Put scalant directly into the crack, pressing limity into place with a wet pointing trowel, making sure to eliminate air pockets. Level with a concrete with a spaint. Brush this "concrete paint" onto the edges of the crack or hole to ensure a strong bond.

Next, pack concrete patch into the void with a pointing trowel, makingsure to eliminate air pockets. Level with a concrete with a pointing trowel, makingsure to eliminate air pockets. Level with a concrete with a pointing trowel, makingsure to eliminate air pockets. Level with a cement air pockets. Level with a concrete with a pointing trowel, makingsure to eliminate air pockets. Level with a concrete mad mortar repair available in cartridge form. Clear away shall be from the organic and bond.

Next, pack concrete patch with a with a pointing trowel, makingsure to eliminate air pockets. Level with

then wet down the area to be repaired.

Stams with a solution of garage and driveway cleaner.

Mrx permanent concrete, patch powder with water, then dilute a small amount of the your "new," clean, bright garage is complete.
